**Immune system.**  
Responds better to vaccinations. Human milk helps to mature immune system. Decreased risk of childhood cancer.

**Skin.**  
Less allergic eczema in breastfed infants.

**Joints and muscles.**  
Juvenile rheumatoid arthritis is less common in children who were breastfed.

**Bowels.**  
Less constipation.

**Urinary tract.**  
Fewer infections in breastfed infants.

**Digestive system.**  
Less diarrhea, fewer gastrointestinal infections. Use of antibiotics in breastfed infants reduces risk of food allergies. Also, less risk of Crohn's disease and ulcerative colitis in adulthood.

**Eyes.**  
Visual acuity is higher in babies fed human milk.

**Ears.**  
Breastfed babies get fewer ear infections.

**Throat.**  
Children who are breastfed are less likely to require tonsillectomies.

**Appendix.**  
Children with acute appendicitis are less likely to have been breastfed.

**Kidneys.**  
With less salt and less protein, human milk is easier on a baby's kidneys.

**Higher IQ.**  
Childhood and other types of fat in human milk support the growth of nerve tissue.

**Endocrine system.**  
Reduced risk of getting diabetes.

**Mouth.**  
Less need for orthodontics in children breastfed more than a year. Improved muscle development of face from suckling at the breast. Subtle changes in the taste of human milk prepare babies to accept a variety of solid foods.

**Respiratory system.**  
Breastfed babies have fewer and less severe upper respiratory infections, less wheezing, less pneumonia and less influenza.

**Cardiovascular system.**  
Breastfed children have lower cholesterol as adults. Heart rates are lower in breastfed infants.

### DURATION OF LACTATION

- Local and cultural patterns of infants are of great significance in determining the duration of breast feeding for a mother.
- A successful lactation can continue as long as sucking stimulation is maintained
- A gradual fall in the amount of milk produced generally developed after 12 months
- Drop in milk - reduced demand and loss of recurrent nipple stimulation by the baby
